DETAILED ACTION

1. Receipt is acknowledged of the Amendment filed 19 January 2005. Claims 1 and 2 are canceled. Claims 3 and 4 are now pending in the application.

Drawings

2. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Asakura (US 5,995,372).

Asakura teaches a memory card structure comprising a circuit board 2 having at least one contact terminal 4 including a first contact terminal located on a top of a first end thereof; and a case 3 located above and spaced apart from the top of the circuit board 2, the case 3 having a size smaller than a size of the circuit board 2, a space being formed between the case 3 and the circuit board 2, the case 3 being spaced from the first end of the circuit board 2 exposing the first contact terminal (see abstract; figures 1A-1C; and col. 4, line 41 to col. 5, line 16).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Asakura (US 5,995,372) in view of Anderson (US 4,565,922). The teachings of Asakura have been discussed above.

Asakura fails to teach or fairly suggest wherein the at least one contact terminal includes a second contact terminal located on a bottom of the first end of the circuit board.

Anderson teaches a key card having contacts on both sides of the card (see abstract; and col. 2, line 65 to col. 3, line 59). In view of Anderson's teaching, it would have been obvious to an artisan of ordinary skill in the art at the time the invention was

Art Unit: 2876

made to employ a card having contact terminals on both sides of the card to the teachings of Asakura in order to allow a card to be inserted and read by a card reader, either side up. Furthermore, it would have been obvious to an artisan of ordinary skill in the art at the time the invention was made to employ a card having contact terminals on both sides of the card, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Response to Arguments

7. Applicant's arguments filed 19 January 2005 have been fully considered but they are not persuasive.

Regarding applicant arguments that the Asakura reference does not teach a circuit board having a contact terminal located on a top of a first end thereof; the case being spaced from the first end of the circuit board exposing the first contact terminal; and a second contact terminal located on a bottom of the first end of the circuit board. The examiner respectfully disagrees. Based on figures 1A and 1C, the examiner believes that the Asakura reference shows a circuit board 2 having a contact terminal 4 located on a top of a first end thereof; and a case 3 being spaced from the first end of the circuit board exposing the first contact terminal. Furthermore, the examiner believes that Asakura as modified by Anderson teaches a circuit board having a second contact terminal located on a bottom of the first end of the circuit board (see rejection above).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
